

# Autumn Acorns

3-5 years

Go for a walk and collect as many acorns as possible. Talk about the sights and sounds, and how nature changes in autumn.

When you are back home, create a picture using acorns. Glue acorns in groups and encourage your child to count the number of acorns in each group. To start off with have no more than five acorns in a group.

## Follow up ideas

When your child is comfortable counting up to five, you can extend this up to ten. You can also write down the number of acorns next to each group on the sheet of paper.
