

Autumn Collage

1-3 years

Please remember to recycle this activity

You'll need

One large piece of white paper and a variety of papers, textiles, paints, colouring crayons all in autumn colours. You will also need some glue and scissors.

Encourage your child to create an autumn collage. Encourage them to explore the materials, talk about how they feel and what colours they are. Depending on their age, encourage them to cut the papers and use paintbrushes and crayons. This will help them to learn how to handle small tools.

Follow up ideas

Try writing the names of colours down on the collage. Talk about what you see in autumn and encourage them to create this on their collage.
