

# Firework Picture

Here's a fun way to make a firework picture for bonfire night.

## You will need:

*Black card, PVA glue  
(with a nozzle end),  
glitter and coloured chalks.*

## Instructions

- ① With the coloured chalks draw your firework picture on to black card.
- ② With a PVA glue bottle tip draw where you would like glitter to appear.
- ③ While the glue is still wet pour over your glitter covering all the glue areas of your picture.
- ④ Once the glue is dry turn your picture on it's side and gently tap away the unwanted glitter. Try not to brush the glitter away, this may smudge your chalk drawing.

You now have a fantastic  
**Firework picture!**
