

Rabbit Mask

Print the next page on to thin card then cut around the dotted lines. (Alternatively colour in the mask on the last page).

Tie one end of elastic or string through the left hand hole with a knot, then thread the other end through the right hand hole. Place around your child's head and adjust the elastic or string to make it to the right length for your child. Tie a knot at the right hand hole, securing the mask to your child's head. Cut off any excess thread.

Please remember to recycle this activity
