

String Halloween Picture

Here's a fun way to make a Halloween picture.

Instructions

- 1 Place your black card on the table, if you are using black paper or printing out one of the templates provided on the next pages, stick it on to card to give you a firm base to work on.
- 2 With a pencil draw an outline of your picture, it could be a spiders web, a ghost, a haunted house, or anything you like! You can print out and use the templates on the next 4 pages if you like.
- 3 Next cut a very long piece of string. With your PVA glue follow your pencil lines sticking your string down as you go along. If you don't have PVA glue with a nozzle you can place the glue straight on to the string. It works the same way but is a little messier.
- 4 Once you've finished allow to dry.

You now have a fantastic
Halloween picture!

You will need:

Black card or black paper, string or white wool, pencil, PVA glue (with a nozzle end), and scissors.

Draw a glue line on top of your pencil drawing.

Stick your string down on to the glue as you go along.

Please remember to recycle this activity
