

Out of the window

Harry and Harriot counted the number of vehicles they saw out of their window in one morning.
They made a chart of their results.

1. How many cars did they see?
2. How many buses did they see?
3. Were there more cars than vans?
4. Did they see fewer cars than buses?
5. Which vehicles did they see most of?
6. How many more cars did they see than lorries?
7. They saw five of which vehicle?
8. How many more lorries than vans did they see?
