

Mother's Day Card

Here's a fun way to make a Mother's Day card.

Instructions

- ① Print pages 3 to 5 on to printer card.
- ② Cut out the black dotted line for the tab on page 3. Cut out the images on pages 4 and 5. **Do not cut out the window just yet!**
- ③ Using a ruler score the fold lines. Place double-sided tape where shown along the top edge. Fold the card inwards.
- ④ Turn the card over by flipping it right to left, so the tab is now on your left and coloured side is faced down on the table. Place double-side tape on the tab. Then using the glue stick cover the sleeve front with glue. Make sure to go right up to the edges. Stick the picture for the sleeve front here.
- ⑤ Turn the card back over and cut out the window along the dotted lines.
- ⑥ Stick down the bottom edge and the tab to make the sleeve. Do this by folding the tab in first, then fold the left side in to create the back of the sleeve. Press down to stick together.
- ⑦ Slide the card slider into the sleeve.
- ⑧ On the back of the flower stick a small square of corrugated cardboard (or a sticky foam square) in the middle, no bigger than 10mm. This helps it slide. Put a piece of double-side tape over the square.
- ⑨ Push the slider all the way in, stick the flower to the top of the slider, where the white dot is, through the window. Make sure it's only stuck to the slider and not the sleeve front.

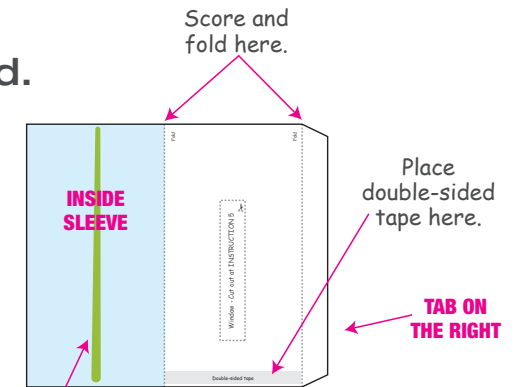

You will need:

A4 thin printer card, scissors, craft knife for cutting the window, glue stick, half inch double-sided tape small square of corrugated cardboard or a sticky foam square and a ruler for scoring the card.

Please remember to recycle this activity

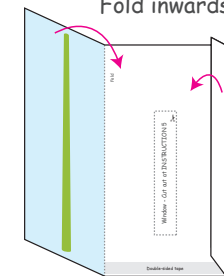

You now have a fantastic
Mother's Day Card!

COLOURED SIDE UP

③

Fold inwards.

Flip over right to left so the coloured side is facing down on the table.

④

TAB ON THE LEFT

SLEEVE FRONT
Cover this side with glue

FOLDS TO MAKE THE SLEEVE BACK

Put double-sided tape here.

Glue the front picture here.

SLEEVE FRONT

INSIDE SLEEVE

5 Turn over and cut out the window.

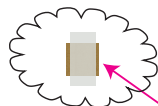

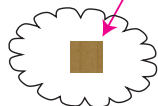

6 Stick the sleeve together by peeling off the tape backing. Fold the tab in first then fold the left side in to create the back of the sleeve. Press down to stick together.

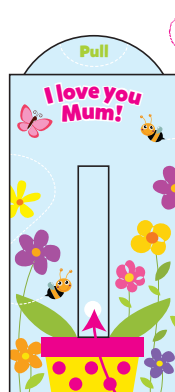

Remove tape backing.

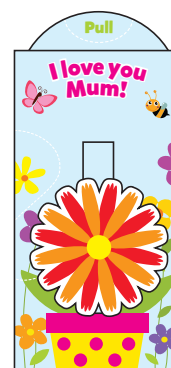

8 Turn the flower picture over and stick a small square of corrugated cardboard (or a sticky foam square) in the middle, no bigger than 10mm. This helps it slide.

Put a piece of double-side tape over the card square.

9 Push the slider all the way in. Stick the flower to the top of the slider where the white dot is, through the window. Make sure it's only stuck to the slider and not the sleeve front.

7 Slide the slider into the sleeve.

To make the flower grow, pull up the slider.

Please remember to recycle this activity

Fold
