

Corn Doll using string

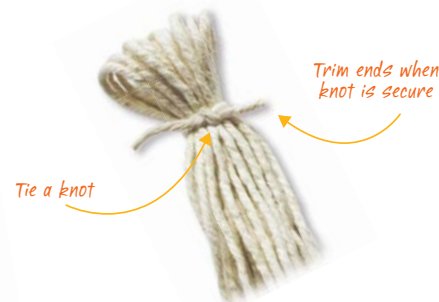

You will need

*String or Wool
and Scissors*

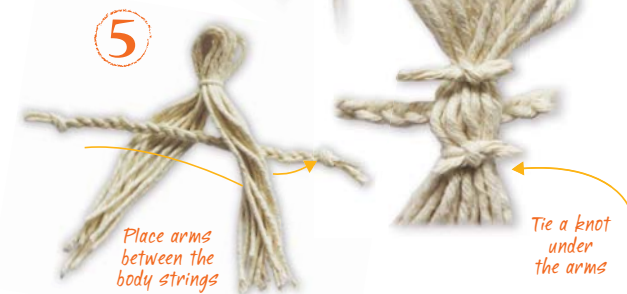

Instructions

- 1 Cut 23 lengths of string or wool about 30cm long.
- 2 Take out 3 lengths of string which you will use for the arms later. Gather up the rest making sure all the ends line up with each other.
- 3 Loop the strings in half, then tie a piece of string at the top as shown to make the head. Trim down the string ends so they're not too long.

- 4 For the arms, tie the 3 lengths of string together at one end. Now plait them by crossing the left string over the middle string

and then cross the right string over the middle string and keep on doing this until you're nearly at the end but leaving enough string to tie the ends in a knot. This should be the same distance from the end as your first knot.

Divide the body string in half as shown. Place your arms in between, then bunch the string back together. Finally tie some string under the arms to make the dolls waist.
