

Food Chains

The energy stored in plants is passed down the food chain to other living things.
Here is a simple food chain.

Plant

Snail

Bird

Fox

Complete these food chains.

Oak leaf → Caterpillar → Small Bird? →

Pondweed → Tadpole → Fish? →

Plant? → → Weasel → Fox

Please remember to recycle this activity

Lots of these food chains fit together into a food web. See if you can make your own by cutting out pictures of different plants and animals. These can then be stuck onto a board.

What would these creatures eat?

Caterpillar	Fox	Mole	Mouse	Cow
