

Filters

Filters are used to separate things. Filters are made from materials that have tiny holes in them.

Look at the list of things below. Tick which of these can be separated using a filter?

- ☐ Cooking oil and chalk
- ☐ Sugar and water
- ☐ Oil and water
- ☐ Water and salt
- ☐ Gravel and water
- ☐ Pebbles and water

WITH AN ADULT

Mix some soil and water together. Pass this through a filter
(You can use a coffee filter). Write down what happens.

Try sawdust and water.
