

Diseases

Sometimes people catch a disease. Here is a list of some viral, (a virus causes this) bacterial (caused by a bacteria) and parasitic (spread by parasites) diseases.

Measles (v)

Rabies, (v)

Yellow fever (v)

Whooping cough (b)

Chlorea. (b)

Malaria (p)

Often diseases can be prevented by injecting people with a vaccine. This stops them from catching the disease. Years ago there were lots of diseases because very few people were vaccinated.
