

Evaporation

Try this...

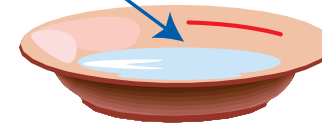

Pour in
the
water

Leave
for a
few
days in
the sun

Look at the
difference

1. Put some **water** into an old saucer or bowl, mark where the edge of the water is.
2. Stand the saucer on a light and **sunny** window sill.
3. Leave it for **several** days.
4. See how much **water** has gone from the saucer.

Before

After

This is called **evaporation**. The liquid, which has been heated up, has turned into a gassy water vapour.

Please remember to recycle this activity

Now try this...

1. Mix up a concentrated solution of several teaspoons of **salt** and **water** in a saucer.
2. Put the saucer somewhere **sunny** and **warm**.
3. Look at the saucer after a **few days**.

What has happened? _____

4. Now try some **sugar** and **water**.

Unscramble these words.
