

Environmental Investigator

Imagine a waste ground in a city. Old trolleys are dumped in the stream together with rubbish. There is graffiti all over the signs and there is rubbish piled up around the bins. There are signs of rats, with seagulls flying around above the rubbish. There are some old empty buildings. A thin fox and her cubs are seen coming out of the woods. Old rotten logs show signs of insects and there are bees and butterflies around the wild flowers that are growing.

Read the paragraph on the first page describing this particular environment. There are signs of animal and bird life, even in these conditions- **why do you think this is?**
What could the local people do to improve this area?

Write a letter to the council expressing your concern about some of the problems the area faces.

Please remember to recycle this activity

Draw a picture of what it might look like **after** local residents and the council got together to clean it up.
