

Dissolving liquids

Achmed and Rusty have been reading a science book and found out:
When you mix some things with water they will **dissolve**. This is when something looks as though it has disappeared. In fact it has made a solution.

Tick which of these will **dissolve** in water?

Put these sentences in order.

1. Salt appears to disappear. _____
2. Stirring it up. _____
3. Pouring a teaspoon of salt into some water. _____
