

Valentine Wreath

This cute wreath is simple to make using a paper plate and some coloured paper.

You'll need

Paper plate

Red and pink paper (or you can use white paper and paint the heart or colour with felt-tips)

Scissors

Glue

Glitter

1

Cut a large round hole in the middle of the paper plate. You should be left with a circle about 2 inches wide, this is the base of your wreath.

2

Then cut out lots of hearts from the red and pink paper. You can draw the hearts and get your child to cut them out. If you're using white paper then colour the hearts in using paint or felt-tips.

3

Glue all the hearts to the paper plate circle. You can sprinkle some glitter on as a finishing touch. Your child could also write a message on the back and give this wreath to someone they love.

Please remember to recycle this activity
